

# Paste-dosing

Your partner for printing wafers with silver- and alu-pastes

Assure your success volumetric!

Paste-dosing for screenprinting

# Innovative products for highly technical requirements

Extract from our product-portfolio

**ViscoPro**

Dosing-system:

- small and flexible
- drive with integrated control
- dosing of high viscous and/or abrasive media

**ViscoDuo-V**

2K-dosing-system:

- mixing of media with different viscosities
- high-accuracy dosing
- suitable for abrasive products, also with solid content
- dot and bead application in one single device

Example: ViscoMT-XS

**ViscoMT**

Barrel-emptying systems:

- for medium to high-viscosity products
- remaining quantity < 1%
- for barrel sizes from 1 l to 1500 l
- emptying speed is electronically adjustable
- clean barrel-emptying on follower plate with special lip seal
- pulsation-free emptying
- easy to handle
- pressures up to 20 bar
- optional as completely heated or as double station with automatic switchover

Example: ViscoTreat-R

**ViscoTreat**

Treating-systems:

- agitating and circulation
- degassing
- for medium to high-viscosity products
- suitable for abrasive products, also with solid content
- pulsation-free conveying
- speed is electronically controllable
- re-filling without process-stop
